

Sustainability Policy

DCE Electrical and Leopard Controls are committed to avoiding, minimizing or mitigating adverse environmental, social or economic impacts associated with the projects and all other activities.

To fulfill commitment to sustainability, DCE Electrical and Leopard Controls will:

- Introduce practices aimed at developing and promoting an institutional culture of environmental awareness, social and economic responsibility across the company;
- Identify and comply with applicable environmental legislation, regulations and social and economic obligations
- Identify and evaluate environmental, social and economic implications of an intended project;
- Ensure that potential adverse impacts and risks are assessed and avoided, or where avoidance is not possible, minimized, mitigated and managed;
- Identify and enhance the opportunities and provide for positive environmental, social and economic outcomes;
- Promote and provide means for adequate engagement with concerned communities and other stakeholders throughout project preparation and implementation, and ensure that relevant environmental and social information is disclosed and disseminated;
- Consider, where relevant, sustainability in the decision-making process when purchasing goods and designing and maintaining facilities;

Signed

Lindsay Dick: 
Managing Director
